

**IMPORTANT: Reduce Motor Load by Valve Load**

**Latch-Up:** Prevents excessive resets by locking out after 3 consecutive resets during any one call for heat.

**To reset from Latch-Up:**

- Depress and hold the red button. Amber light will blink after 10 seconds, red light will stay on solid.
- After amber light stops blinking (approximately 20 seconds), release red button.

Releasing red button during step 1 and 2 will result in the control returning to latch-up
